User Management:

The Palturai API app works with a client-based user management. This allows the administrator of the respective client to view the personal data of the client's users.

Tagging & User Relations

The raw data is viewable only by Palturai. For users, only a flag is visible in the database when a Palturai record matches a client record. Again, this is only visible within a client.

Data responses of the API:

This data is visible to all users.

In addition, various processors may be recipients of personal data if they provide a partial service of the processing operation. Categories of recipients of personal data are in particular:

- Hosting service providers
- Other processors engaged to provide and improve our app.

In addition, it is possible that personal data will be transferred to partner companies of Palturai GmbH as part of the service provision. Recipients within the Palturai group of companies are in particular:

V. Deployment of the BusinessGraph Platform and creation of the log files

1. Description and scope of data processing

Each time our service is called up, our system automatically collects data and information from the computer system of the calling computer.

The following data is collected in this context:

- Date and time of access
- IP address

This data is stored in the log files of our system. Storage of this data together with other personal data of the user does not take place.

The app is hosted using computing capacity provided by the service provider:

Hetzner Online GmbH
Industriestraße 25
91710 Gunzenhausen
Germany

The service provider may gain access to the above-mentioned data. The server locations of the service provider are in Germany (Nürnberg, Falkenstein/ Vogtland)) should EU citizens use our app.

2. Purpose of data processing

The temporary processing of the IP address by the system is necessary to enable delivery of the app to the user's computer. For this purpose, the user's IP address must remain stored for the duration of the session.

The storage in log files is done to ensure the functionality of the app. In addition, we use the data to optimize the app and to ensure the security of our information technology systems. An evaluation of the data for marketing purposes does not take place in this context.

These purposes are also our legitimate interest in data processing according to Art. 6 para. 1 p. 1 lit. f DSGVO.

3. Legal basis for data processing

The legal basis for the temporary storage of data is Art. 6 para. 1 p. 1 lit. f DSGVO.

4. Duration of storage

The data will be deleted as soon as they are no longer required to achieve the purpose for which they were collected. In the case of the collection of data for the provision of the service, this is the case when the respective session has ended.

In the case of storage of data in log files, this is the case after seven days at the latest. Storage beyond this is possible. In this case, the IP addresses of the users are deleted or alienated, so that an assignment of the calling client is no longer possible.

5. Possibility of objection and elimination

The collection of data for the provision of the app and the storage of the data in log files is mandatory for the operation of the app. Consequently, there is no possibility of objection on the part of the user.
